PROJECT OVERVIEW

With a population in excess of 680,000 residents and growing, Will County (WC) is in need of a more suitable Morgue and Coroner's facility. Currently, the WC Coroner's Office is located at 158 N. Scott Street in Joliet, IL. The WC Morgue is located in a separate building in nearby Crest Hill, IL. The new building, to be located in the 16800 block of Laraway Road, Joliet, IL, is east of the WC Public Safety Complex and west of the WC Department of Transportation's Administration Building, as depicted in **Appendix A**. Also included in **Appendix A** is a conceptual floor that has been developed in conjunction with the WC Coroner's Office consisting of approximately 10,500 square feet. Working with the project team, the construction manager (CM) shall be responsible for constructing this building, ultimately producing a new, modern, secure, durable, energy efficient, architecturally appealing, and one story building within the established parameters for both cost and schedule.

PROJECT APPROACH

A teaming arrangement will be required between the CM, Architect/Engineer A/E), the WC Executive's Office (WCE) and WC Coroner's Office (WCC). This arrangement will prevail during all project phases. The total project budget is between \$5-6M, inclusive of both 'hard' and 'soft' costs. Together with the A/E, the CM shall be responsible for design review, cost-savings recommendations, trade contractor outreach, bidding, scheduling, site logistics/safety, work sequencing, quality management, and project documentation. CM services will be required during the pre-construction, construction and post-construction phases. Other expectations, duties, responsibilities and requirements that may occur as a result of responses to this RFQ will be further articulated by the WCE during contract negotiations.

Schematic Design

The Schematic Design shall include (at a minimum): a proposed site plan, physical size and characteristics of the building, preliminary elevations and sections; plus, contemplated building systems and corresponding operational layouts of the facility. An itemized cost estimate and baseline schedule for completion of design development and construction phase activities shall be prepared by the CM and included for presentation to elected Will County Officials for approval prior to proceeding with Design Development.

This includes updates of Master Project Schedule for review and approval by the WCE.
6. Provide and implement procedures for both quality control and schedule adherence.
7. Perform constructability reviews of the design documents, as required.
8. Provide detailed cost estimates at the SD, 50% and 100% Design Development milestones to include itemizations for each major trade. Identify perceived savings or overruns.

Construction Documents

CM shall be responsible for the following:

1. At the 100% Design Development milestone, provide the Final Cost Estimate for the project, itemized in current CSI format that includes the CM's detailed quantity take-offs and cost estimate for each Division. CM shall utilize the Final Cost Estimate as the **costing model** for the project, towards which all project costs will be compared.
2. CM understands that project will be bid at the trade level in accordance with all applicable federal, state and county requirements.
3. In consultation with the WCE/B, identify qualified, experienced local trade and specialty contractors for each major and special trade category as defined by the final cost estimate.
4. In conjunction with the A/E, subdivide the work into bid packages that encourage bids from qualified local and *minority* / women contractors, suppliers and vendors. Provide a detailed construction schedule with precise timeline for release of bid packages.
